

# CHRISTMAS CANDLES

© Hazel Rose Spencer 2018

## Supplies:

You'll need the 4" square Multi loom for this one.

And one digital battery tea light for each candle you make. 1&1/8" diameter (3cm).

A nice sparkly Christmas yarn makes a pretty candle and you'll need 9.5 yards for each candle. Good for using up stash.

Polly or wool stuffing.

Yarn needle & scissors.

Weave on square for each candle. Use your tea light and trace around it on a piece of shirt or cereal box cardboard. Cut out the circle.

Sew your square into a tube. Use an over hand stitch through the loops. knot! Make sure your tube is still wide enough for the candle to fit into one end.

Using the same yarn run a gather stitch through the edge loops and draw up, Insert your cardboard circle into the bottom of the tube and center it. Draw the bottom of the candle tightly and knot.

stuff the candle to  $\frac{3}{4}$ " from top. Insert your tea light into the top, adjust the amount of stuffing you need to keep the candle just below the top edge of the candle. You will

have to take the candle out in order to turn it on and off.

I don't have ant holly or ivy but you could decorate your look with the silk version. These are stuck to the log with just a tiny bit of hot glue.

I gathered around the edge of a 4" red square and pulled it up around the bottom of the candle to made a little base for it.

They do glow in the dark!

This is last years version. I used a 2" square to make the base and crocheted a circle for a handle. These were then sdev to the candle. If you don't crochet (you really should learn) you could use a chenille stem for the handle.

Decorate then wiuth sequiens, buttons, flowers, ribbon... You get the idea.
